#### COLLECTIONS FOR THE FISCAL YEAR ENDED JUNE 30, 1894.

In my last annual report I estimated that the receipts of this Bureau for the fiscal year ended June 30, 1894, would aggregate \$150,000,000. Throughout the entire year the financial depression tended to materially reduce the receipts from all sources of internal taxation, and it is with much regret that I am compelled to state that the receipts fell short of the estimate in the sum of \$2,831,550.30, the actual collections being \$147,168,449.70.

The following tables exhibit in detail the amount of internal revenue collected during the fiscal year ended June 30, 1894, the sources which yielded the revenue, the total sums collected in each collection district, State and Territory, the cost of collecting, etc.:

The percentage of the cost of collection is 2.70 per cent. The expenses for the previous fiscal year were \$4,219,739.36, being 2.62 per cent of the collections, showing a slight increase of percentage of cost over the previous fiscal year.

The amount appropriated for the purpose of detecting and bringing to punishment persons guilty of violating the internal-revenue laws, for 1894, was \$25,000. This amount has been more than exhausted by the claims already presented to this office for payment. It will therefore be necessary to ask for an additional appropriation of \$500.

There were also employed 696 gaugers, who received fees not to exceed \$5 per day; 546 storekeepers, and 1,234 storekeepers, and gaugers, whose pay did not exceed \$4 per diem, and 6 distillery surveyors. All the foregoing officers are paid only when actually employed.

Storekeepers are assigned to those distilleries only which have a surveyed daily capacity of 100 bushels or more, and are paid such compensation as may be prescribed by the Commissioner of Internal Revenue, not to exceed \$4 per day.

The pay of storekeeper and gaugers assigned to distilleries whose registered daily capacity is 20 bushels or less is fixed by law at \$2 per diem. The pay of those assigned to larger distilleries has been graded according to the following scale:

Compensation for storekeeper and gaugers assigned to distilleries having a surveyed daily capacity exceeding 20 bushels and not exceeding 40 bushels, \$3 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 40 bushels and not exceeding 60 bushels, \$3.50 per day; compensation of those assigned to distilleries having a surveyed daily capacity exceeding 60 bushels, \$4 per day.

#### GENERAL CONDITION OF THE OFFICE AND THE SERVICE.

The work of this Bureau is in good condition, both in this office and in the field. It affords me great pleasure to commend the efficiency, industry, and competency of the officers, clerks, and employés in every branch of the service, which is evidenced by the prompt and accurate disposal of all business of the Bureau up to date.

Examinations have been made of the offices of the several collectors of internal revenue as frequently during the fiscal year as was possible with the limited force of revenue agents at my command, and the condition in which these offices were found and reported justifies the conclusions above set forth.

## INTERNAL-REVENUE INSPECTORS.

In accordance with the provisions of legislative act of March 3, 1891, authorizing the Commissioner of Internal Revenue to employ not to exceed twelve inspectors whose duty shall be to inspect sugar upon which a bounty is required to be paid, and to perform such other duties as may be required by the Commissioner, twelve inspectors have been employed during the past year, at a compensation of \$5 per day while actually and necessarily employed and their necessary traveling expenses.

These inspectors have been employed most of the time in connection with the payment of bounty on domestic sugar, and have been assigned as follows:

|                                                 |    |
|-------------------------------------------------|----|
| Districts of Kansas, Nebraska, and Montana..... | 1  |
| First district of California.....               | 1  |
| Districts of Louisiana, Texas, and Florida..... | 10 |

During the maple-sugar season inspectors were employed in connection with inspection and classification of maple sugar upon which bounty was claimed in the following districts:

|                                                                            |   |
|----------------------------------------------------------------------------|---|
| Districts of New Hampshire, and Massachusetts.....                         | 2 |
| Fourteenth, twenty-first, and twenty-eighth districts of New York.....     | 1 |
| Twelfth, and twenty-third districts of Pennsylvania.....                   | 1 |
| Tenth, and eighteenth districts of Ohio and first and fourth Michigan..... | 1 |

In the cane-sugar-producing districts it was found necessary to employ some of the inspectors during the entire year. In the beet and sorghum producing districts they were employed from three to five months, and in the districts where maple sugar is produced their services were required about three months.

When not occupied with duties as sugar inspectors they were employed with revenue agents on general duty in connection with the internal-revenue service.

EXPENSES OF REVENUE INSPECTORS.

The appropriation for the payment of salaries and expenses of inspectors was \$25,000. The following expenditures chargeable to that appropriation have been made during the year:

|                                              |             |

REDEMPTION OF CHECK AND PROPRIETARY STAMPS.

Since July 1, 1893, and up to June 30, 1894, 72 applications for redemption of check and proprietary stamps have been received for consideration, the sums stated varying from 10 cents to \$22.96, and the different values amounting in the aggregate to \$187.01. The time allowed by law for the redemption of these classes of stamps having expired by limitation June 30, 1886, the claims were rejected and the stamps forwarded therewith were returned to the applicants.

At the close of the last fiscal year there were remaining 78 packages of check and proprietary stamps undisposed of. These packages are made up of cases incomplete as to data, some containing stamps without claims, and others claims unaccompanied by stamps. None of the old claims have been disposed of, and are chiefly those for which no clue to ownership can be obtained. Inasmuch as these claims have been carried upon the reports from year to year, it is recommended that some disposition be made of them in order that they may be omitted from future reports of this office.

#### PRODUCTION OF STAMPS.

The Bureau of Engraving and Printing prints and supplies all of the internal-revenue stamps used, with the exception of stamps for tobacco imprinted on foil wrappers, which have been printed and furnished by the John J. Crooke Company, of New York, under a contract which provides that the imprinting of such stamps shall be without cost to the Government, the contractor receiving such remuneration from the manufacturers of tobacco as may be agreed upon between them, and reimbursing to the Government the salaries of one stamp agent for the United States and one counter, amounting to \$2,500 per annum.

#### MANUFACTURE OF STAMP PAPER.

After due advertisement for proposals to furnish paper for the fiscal year ending June 30, 1895, to be used in the printing of United States internal-revenue stamps, ten bids were presented. The bids were opened on the 5th day of April, 1894, and after proper consideration of the same—the customary and usual tests of the various samples of paper submitted with the bids having been made—the contract for supplying the paper was awarded on the 6th day of April, 1894, to Messrs. Alexander Balfour & Sons, of Philadelphia, Pa., at the rate of 5 cents per pound, including expenses for its transportation and delivery at the Treasury Department, this being a reduction of 1 cent from the former contract price, which was 6 cents per pound. The advertisement for the proposals stated that the quantity of paper likely to be required for the ensuing year would be about 800,000 pounds. It is now apparent by the regular annual increase of the demand for the several classes of stamps that the amount of paper required will be 1,000,000 pounds. The manufacture of paper under the contract with Messrs. Balfour & Sons was commenced on the 1st day of September, 1894.

#### OFFICIAL COUNT OF STAMPS IN VAULT.

In accordance with instructions contained in Department letter of December 9, 1893, appointing a committee to make an inventory of the internal-revenue stamps in the vaults of the stamp division, the committee reported and took possession of the vaults at 9 o'clock on the morning of December 27, 1893, with a force of 2 clerks, 35 expert counters, and 20 packers and laborers selected from different offices of the Department, and proceeding at once with the count, completed the work on January 3, 1894. They reported the balances found by actual count to agree in every respect with the balances reported by the superintendent of the vault and the statement of balances called for by the

books in the office of the Secretary, all of which were verified by the count and found to be absolutely correct. The following summary of transactions illustrates the extensive and responsible work performed in the stamp division in the past year.

There were on hand December 27, 1892, when the previous count was made, 64,813,844 stamps (value, \$22,604,460). From that date to December 27, 1893, there were received from the Bureau of Engraving and Printing (and from collectors of internal revenue for re-issue) 1,011,707,280 stamps (value, \$182,195,719), making the total to be accounted for 1,076,521,124 stamps (value, \$204,800,179).

There were delivered for issue, reissue, and destruction during the period named 972,130,402 stamps (value, \$169,249,011), leaving a balance to be accounted for on the morning of December 27, 1893, of 104,390,722 stamps (value, \$35,551,167.87), which by actual count were found to be in the vaults on that date.

The committee, in closing their report, state that they feel justified in emphasizing the fact that these extensive operations, involving the receipt, custody, and issue of more than one billion stamps, have been conducted without loss to the Government, a result which indicates the highest degree of efficiency on the part of the officers and employes charged with this responsible duty, and that the checks and safeguards adopted by the Department to insure accuracy and proper accountability in the receipt and issue of stamps are well calculated to secure that result.

#### STOCK OF STAMPS IN VAULT.

The present stock of stamps in the vaults of this Bureau does not come up to the requirements of the statute and is inadequate to meet the demands of the service. It is estimated that the three months' supply which the statute requires to be in the vault should be 300,000,000 stamps of the various classes and denominations. The stock on hand in the vault to October 9, 1894, is only 96,296,482 stamps of all denominations. The inability to maintain the stock at the statutory requirement is due to the failure of the Bureau of Engraving and Printing to fill the orders from this Bureau as called for. There are now due from the Bureau of Engraving and Printing on past orders 140,452,100 stamps, and orders for November delivery amount to 97,848,000 stamps.

I am pleased to state, however, that the deliveries from the Bureau are gradually increasing, and it is believed that within a short time the stock of stamps in the vault will be brought up to the statutory requirement.

Under the provisions of an act passed August 28, 1894, imposing a tax on playing cards, this Bureau has issued 12,505,000 "stock on hand" stamps, and 6,057,000 stamps for manufacturers, up to and including October 9.

#### REGISTRATION OF CHINESE.

Under the provisions of the amendatory act of November 3, 1893, certificates of residence of Chinese laborers and other than laborers entitled to remain in the United States before the passage of the original act of May 5, 1892, are required to be issued by this office. The total number of certificates so issued on applications received up to and including May 3, 1894, was 106,811.

## THE TABULAR STATEMENTS.

In the tables annexed will be found statements showing the manner in which the manufacturing is distributed among the different States and districts, the number of persons and firms engaged in each of the two branches of manufacturing, the quantity of different kinds of materials used, and the quantity and kinds of product manufactured. These tables are compiled from the reports received from the collectors of internal revenue of the transactions of manufacturers in their several districts for the calendar year ended December 31, 1893, a period of time differing from the fiscal year ended June 30, 1894, which will account for any apparent discrepancies between them and the previous part of the report relating to tobacco.

About 1,700 cigar manufacturers qualified as tobacco manufacturers in order to lawfully put up and sell their scrap and waste tobacco as smoking tobacco. About 68 persons qualified and kept books as tobacco manufacturers solely for the purpose of lawfully dealing in the

refuse scraps, clippings, cuttings, and waste, and pack this material in bulk and export most of it to foreign countries. Four firms have qualified as tobacco manufacturers solely for the purpose of making sheep wash and fertilizers from tobacco stems. The number of tobacco manufacturers who buy leaf and manufacture it is not over 800. About 50 of these manufacture over 1,000,000 pounds apiece, of whom 5 average over 10,000,000 pounds annually. Nearly 200 manufacture over 100,000 pounds and less than 1,000,000 each.

The average yield per bushel of grain was  $\frac{87,340,897}{19,716,818} = 4.42$  + gallons of spirits. The average yield per gallon of molasses was  $\frac{1,864,595}{2,598,409} = .717$  + of a gallon of rum.

\*Two million eight hundred and seventy-eight thousand one hundred and twelve gallons of molasses were used for the production of spirits instead of rum; and their equivalent, estimated in bushels of grain, is added to the total grain in determining the yield per bushel of grain.

COMMISSIONER OF INTERNAL REVENUE.

## THE REVENUE ACT OF AUGUST 28, 1894, AS TO THE INTERNAL-REVENUE TAX ON DISTILLED SPIRITS.

Under the provisions of the act of August 28, 1894, the tax on distilled spirits was increased from 90 cents to \$1.10 per gallon and the bonded period was extended from three years to eight years. Although this act did not become a law until August 28, it was evident, at least as early as June, 1894, that the tax on distilled spirits would be increased. This fact explains the great increase in the tax-paid withdrawals of distilled spirits during July and August, 1894, as shown in the foregoing table, over those for the same months in July, 1893, and the decrease of such withdrawals during September, 1894, as compared with those for the same month in 1893. The heavy withdrawals made in June, July, and August, 1894, had the effect of overstocking the market with tax-paid spirits, as will more fully appear in the table on pages 684 and 685, causing a falling off in the tax-paid withdrawals during October and November, 1894. These known facts indicate that although the rate of tax on distilled spirits was materially increased by the act named, this act may not have the effect of proportionately increasing the revenue during the year ending June 30, 1895.

OLEOMARGARINE.

The following statements, showing operations under the act of August 2, 1886, defining butter and imposing a tax upon and regulating the manufacture, sale, importation, and exportation of oleomargarine, comprise—

First. A summary of operations at oleomargarine manufactories during the fiscal year ended June 30, 1894; also a summary of operations during the past two fiscal years, and by months covering the period from November 1, 1886, to June 30, 1894.

Second. A statement of the receipts from all classes of taxes imposed by the oleomargarine law for the year ended June 30, 1894.

Third. A statement by States and Territories showing the number of establishments for which special tax was paid to carry on during the fiscal year ended June 30, 1894, the business of manufacturing and dealing in oleomargarine; also, in aggregate, of all persons who paid oleomargarine special taxes for the twelve months ended June 30, 1893.

Fourth. A statement of the total production and of total receipts from all oleomargarine sources for each fiscal year since the oleomargarine law took effect.

It appears from the subjoined table that the average monthly production of oleomargarine under the operations of the law has been as follows:

#### AMENDMENTS SUGGESTED TO PRESENT LAW.

The existing laws imposing the tax and regulating the manufacture, sale, and exportation of oleomargarine are deficient in many respects. A reenactment of the laws would, no doubt, be the wisest and most effective way of correcting the existing defects; but if that is not practicable I renew the recommendations in my report of last year, that the following amendments, which are regarded as of most importance and which were suggested by my predecessor in his annual report for the year ended June 30, 1892, be enacted:

"Section 3 of the act of August 2, 1886, defines a retail dealer in oleomargarine to be 'every person who sells oleomargarine in less quantities than 10 pounds at one time,' whereas section 6 of this act provides that 'retail dealers in oleomargarine must sell only from original stamped packages in quantities not exceeding 10 pounds.'

"To reconcile the two sections, section 6 should be amended by striking out the words 'not exceeding,' and inserting in lieu thereof the words 'less than.'

"As a wholesale dealer in oleomargarine is defined to be a person who sells it 'in the original manufacturer's packages' (section 3, act August 2, 1886), and it is further provided that 'all sales made \* \* \* by wholesale dealers in oleomargarine shall be in original stamped packages,' persons who sell more than 10 pounds, not in the original stamped packages, can not, as the law stands, be required to pay special tax as wholesale dealers; nor is there any criminal provision of the statutes directly reaching such cases.

"If it be deemed inadvisable to change the law which confines a wholesale dealer in oleomargarine to selling only 'original stamped packages,' then the sale of 10 pounds or more, not in such packages, should be made a criminal offense by an amendment to section 6 of the act.

"Section 41, act of October 1, 1890, requires wholesale dealers in oleomargarine to keep books and render returns in compliance with the regulations, but no penalty for violation of this section is provided for therein; and in view of recent decisions of the courts, it would seem that a penalty clause, directly accompanying the provisions of a statute requiring certain acts to be done, is essential to an effective enforcement of the law.

"It is suggested that the last sentence of section 6, act of August 2, 1886, be stricken out and the following inserted:

" 'Every person who knowingly sells, or offers for sale, or delivers or offers to deliver, any oleomargarine, in quantities exceeding 10 pounds at one time, otherwise than in the original stamped packages, and every retail dealer in oleomargarine who sells or offers for sale, oleomargarine otherwise than as herein required, or delivers or offers to deliver oleomargarine in any other form than in new wooden or paper packages as above described, and every manufacturer, dealer, or other person, who packs in any package any oleomargarine in any manner contrary to law, or who falsely brands any package, or affixes a stamp on any package denoting a less amount of tax than that required by law, shall be fined for each offense not more than \$1,000 and be imprisoned not more than two years.'

"The third clause of section 3 should be amended by applying the provisions of that clause of section 3244 of the Revised Statutes relieving from liability to special tax persons selling oleomargarine as executors, administrators, or in any other fiduciary capacity.

"Section 5 should require every manufacturer of oleomargarine to file with the collector of the district a description of the premises constituting his manufactory, and that no business shall be carried on on those premises except the manufacture of oleomargarine or of other substances necessary for and to be used exclusively in the manufacture of the oleomargarine produced thereon.

"Section 6 should be amended by requiring that all oleomargarine intended for consumption or sale in this country should be packed as required by that section. The same section should provide that all oleomargarine intended for exportation to a foreign country should be packed in wooden or metallic tubs or other vessels, as prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury.

"Section 16 should be amended by striking out the clause in the third and fourth lines 'without affixing stamps thereto,' thus giving the Commissioner, with the approval of the Secretary of the Treasury, authority to prescribe *export stamps* to be affixed to packages intended for exportation.

"The last clause of the same section should be amended by substituting for the words 'export oleomargarine' the words 'remove from the place of manufacture oleomargarine for exportation,' so as to require the package intended for export to be branded by the manufacturer before or at the time of removal.

"I think there should be a penalty denounced in section 16 for failure to brand packages of oleomargarine intended for export as required in that section."

In my report of last year I suggested the propriety of a reduction of the special taxes imposed upon wholesale dealers (\$480) and retail dealers (\$48) to \$120 and \$12 per year, respectively. This suggestion was based on the belief that the present rate of taxation is exorbitant compared with special taxes imposed upon other occupations, and that the proposed reduction would not result in loss of revenue. I am still of opinion that such reductions should be made.

## SUGAR BOUNTY DIVISION.

The Commissioner of Internal Revenue has been charged with the execution of the law providing for a bounty on sugar of domestic production at the rate of 2 cents per pound on sugar testing not less than 90°, and 1½ cents per pound on sugar testing less than 90° but not less than 80°, by the polariscope. The bounty, which became available July 1, 1891, was authorized by the tariff act approved October 1, 1890, which was repealed by the tariff act in force August 28, 1894.

The sugar producers in this country may be divided into four classes relative to the kind of raw materials used, namely: Cane-sugar producers, beet-sugar producers, sorghum-sugar producers, and maple-sugar producers. The cane sugar, constituting the great bulk of the domestic sugar, is produced in the South, mainly in Louisiana; the beet and sorghum sugars are the products of the West, and the maple sugar is produced mainly in the States of Vermont, New York, Pennsylvania, and Ohio.

Tabulated statements, showing in detail the operations of each of these four classes of producers and their locations by States, will be given in the following pages.

As required by the bounty provisions of the tariff act of 1890, above referred to, each sugar producer intending to claim bounty has filed, prior to July 1 of each year, with the Commissioner of Internal Revenue, a notice of the place of production, with a general description of the machinery and methods of manufacture to be employed, and an estimate of the amount of sugar proposed to be produced up to the end of the next ensuing fiscal year, including the number of maple trees to be tapped in that period. Each notice has included an application for a license to produce sugar under the bounty provisions of the law, and has been accompanied by a bond in a penal sum equal to at least one half the bounty estimated to be earned at 2 cents per pound during the next ensuing fiscal year; the penalty in no case, however, having been less than \$100, and always conditioned on the faithful observance of the laws, rules, and regulations pertaining to bounty on sugar. Upon approval of the notices, applications, and bonds of the sugar producers, licenses have been duly issued to them by this office.

During the fiscal year ended June 30, 1894, 6,349 licenses were issued to domestic sugar producers intending to claim bounty on their product, and \$12,100,208.89 net, after deducting refundments, were disbursed by this office in payment of approved bounty claims. During the fiscal years ended June 30, 1892, and June 30, 1893, \$7,342,077.79 and \$9,375,130.88, respectively, were disbursed as bounty on sugar, making with last year's bounty, a total disbursement of \$28,817,417.56, exclusive of administrative expenses incurred in executing the bounty law.

Estimating the production of maple sugar at 32,000,000 pounds per annum, and basing the production of cane, beet, and sorghum sugar on the official weights thereof, it is found that the total domestic sugar production during the fiscal year ended June 30, 1892, amounted to 412,893,230 pounds. The next fiscal year it increased to 515,250,769 pounds, and during the fiscal year ended June 30, 1894, it further increased to 689,230,790 pounds, which is 66.9 per centum over the sugar production in the first bounty year mentioned.

As will be shown in the following statistical statements pertaining to the maple-sugar production covered by bounty claims, only a small portion of the domestic maple sugar has been produced under Government supervision for the benefit of bounty. A very large number of maple-sugar producers in this country do not make 500 pounds of sugar per annum, which was the minimum annual production on which bounty could be allowed under the late bounty law. Many other domestic maple-sugar producers, who make more than 500 pounds of sugar per annum, have been unwilling to go to the trouble and expense of complying with the late bounty law and regulations.

The work of weighing, sampling, polarizing, and classifying the large quantity of domestic sugar produced under Government supervision for the benefit of bounty; of preparing the prescribed returns of this sugar and keeping proper records thereof, and of the bounty claims based thereon; of examining the bounty claims and returns of sugar producers, and otherwise attending to all details necessary to insure a faithful observance of the law, has required the services of many additional employes during the sugar-producing season, besides the twelve sugar inspectors and the additional clerical force in this office, which have been provided for by law.

The number of extra deputy collectors acting as sugar weighers, and of clerks, messengers, and laborers employed last year on work occasioned by the sugar bounty, and the amounts paid them as compensation and traveling expenses, were as follows, by collection districts:

## CANE SUGAR.

There were 579 licenses issued to cane-sugar producers during the fiscal year ended June 30, 1894, and sugar was produced under 533 of these licenses. Of this latter number 508 were issued for the collection district of Louisiana, embracing the States of Mississippi and Louisiana, with only 1 license for Mississippi; 13 were issued for the third collection district of Texas and 12 for the collection district of Florida.

The total quantity of cane sugar produced during the said fiscal year, so far as the same was officially weighed, amounted to 611,156,922 pounds, of which 597,969,745 pounds were produced in the collection district of Louisiana, 11,882,852 pounds in the third collection district of Texas, and 1,304,325 pounds in the collection district of Florida. The increase in the production of cane sugar during the last fiscal year over the fiscal year ended June 30, 1893, amounted to 156,015,541 pounds, being equal to 34.3 per centum, but the number of licenses issued to cane-sugar producers decreased from 650 to 579, and the number of actual cane-sugar producers from 551 to 495.

The decrease in the number of cane-sugar producers, notwithstanding the large increase in their production, is due to the fact that a number of primitive open-kettle sugar factories are being discontinued from year to year in the collection district of Louisiana, where the sugar production is gradually being concentrated in the hands of the sugar producers possessing the most modern and improved machinery for the manufacture of sugar. Many persons who formerly made open-kettle sugar are now selling their sugar cane, or the sirup produced therefrom, to the sugar producers who possess large factories containing vacuum pans and centrifugals with other modern machinery.

In the fiscal year ended June 30, 1894, the area of land devoted to the culture of sugar cane in the United States was reported to be 289,940 acres, of which 281,667 acres were cultivated in the collection district of Louisiana, 7,060 acres in the third collection district of Texas, and 1,213 acres in the collection district of Florida. These figures show an increase in area of 60,288 acres over the area reported for the fiscal year ended June 30, 1893. It should be observed, however, that this statistical information is not exactly accurate, owing to the great difficulty in obtaining complete and exact reports, especially of the cane and sirup purchased by the licensed sugar producers. Persons who sell cane are generally small planters, who have no exact measurements of their cane lands, but base their reports of area given to the purchaser, and by him to this office, on estimates made from the weight of the cane or the quantity of the sirup produced therefrom. Even some of the licensed sugar producers have no measurements of their cane lands and no scales for weighing their cane. In making their reports to this office they therefore have to estimate the acreage and the weight of their cane, the latter being usually based on the number of cane loads hauled to their sugar factories. The figures given in this report are the most accurate obtainable, and are certainly within a narrow margin of the actual facts in the case.

The sugar cane actually ground and used in the production of sugar is considerably less in area and weight than the total cane cultivated, as shown by the following statements. This is accounted for by the fact that a large quantity of cane is annually reserved for seed and another considerable portion of cane is destroyed by inundation, early frosts, or other mishaps. The sugar cane reserved for seed during the fiscal year ended June 30, 1894, embraced 36,112 acres, according to reports received.

The following statistical statements give the data in detail pertaining to the domestic cane-sugar industry and the bounty paid on domestic cane sugar during the fiscal year ended June 30, 1894.

NOTE.—It should be observed that the above 508 licenses under which sugar was produced represent only 470 individuals, firms, and corporations. The difference of 38 is caused by the fact that 25 of the licensed sugar producers own two or more sugar factories, each of which is represented by a separate license.

The following is a summary statement of the operations of the licensed cane-sugar producers in the collection district of Louisiana,\* and of the amount of bounty paid these producers during the fiscal year ended June 30, 1894:

NOTE.—It was found that some of the official weighers in the collection district of Louisiana returned excessive weights of the sugar weighed by them. In such cases the commercial weights upon which the sugar was sold were adopted by this office, whenever obtainable, as a guide in the correction of the erroneous weights returned. When bounty claims had been allowed prior to the discovery of discrepancies in the weights of the sugar, producers were requested to refund the amounts over paid. These refundments to June 30, 1894, amounted to \$1,261.61; and since that date the sum of \$1,212.54 has been refunded.

BEET SUGAR.

Seven beet-sugar producers were licensed by the Government to manufacture sugar during the fiscal year ended June 30, 1894.

There was an increase of one producer and of 18,108,008 pounds in the production of sugar, which is equal to 66 $\frac{2}{3}$  per cent + over the beet-sugar production during the fiscal year ended June 30, 1893, amounting to 27,083,288 pounds, against 45,191,296 pounds during the last fiscal year.

As to the method of manufacturing beet sugar, it can be stated that all the beet-sugar producers in the United States use the most modern machinery, consisting of diffusion batteries for extracting the juice from the beets, vacuum evaporators for making sirup, and vacuum pan and centrifugal factories for granulating the beet sirup.

The data pertaining to the operations of the beet-sugar factories, as well as bounty payments on beet sugar, during the fiscal year ended June 30, 1894, are presented in the following tabulated statements:

\* Of the beets used 22,051.1 tons, embracing an area of 2,878 acres, were cultivated by the licensed sugar producers themselves, while 173,844.7 tons, covering an area of 16,767 acres, were purchased by the sugar producers from contractors and neighboring farmers.

† A small quantity of the sugar produced was extracted from molasses carried over from the prior fiscal year, but as this additional production is about offset by sugar-producing material on hand June 30, 1894, it will not affect the correctness of the above computations.

SORGHUM SUGAR.

The Medicine Lodge Sugar Company, Medicine Lodge, Kans., and the Parkinson Sugar Company, Fort Scott, Kans., were the only sorghum-sugar producers licensed during the fiscal year ended June 30, 1894. These producers are possessed of the most modern machinery for making sugar, consisting of diffusion batteries for extracting the juice from the sorghum, vacuum evaporators for boiling the juice into sirup, and vacuum pans and centrifugal machinery for granulating the sirup.

Kansas is the only State in the Union which is engaged in the production of sugar from sorghum.

The reported production of sorghum sugar in Kansas in the fiscal year ended June 30, 1892, was 1,136,086 pounds; in the next fiscal year it amounted to 1,026,100 pounds, and in the fiscal year ended June 30, 1894, 882,572 pounds were produced.

In addition to the above production, 950 pounds of sugar were made in the State of Minnesota, from sorghum planted for an experiment, in the fiscal year ended June 30, 1893.

The following is a summary statement of the operations of the licensed sorghum-sugar producers and of the amount of bounty paid these producers during the fiscal year ended June 30, 1894:

## MAPLE SUGAR.

As a large number of maple-sugar producers in this country have taken out no licenses, and have produced no sugar under Government supervision for the bounty during the existence of the late bounty law, this office can not furnish complete data of the domestic maple-sugar production.

The maple sugar produced during the fiscal year ended June 30, 1892, by licensed maple-sugar producers who submitted reports, amounted to 3,981,953 pounds. During the fiscal year ended June 30, 1893, the domestic maple-sugar production reported by the licensed producers aggregated 7,655,116 pounds.

Complete reports of the maple sugar produced under the bounty regulations during the fiscal year ended June 30, 1894, have not yet been received, and no bounty has been paid on this product. It is learned, however, from the internal-revenue collectors' annual reports of the operations and bounty claims of the licensed maple-sugar producers, that 7,633,036 pounds of maple sugar were produced during the last fiscal year under Government supervision.

As to the weighing, sampling, and polarization of the maple sugar, it may be stated that the sugar was weighed and sampled by deputy collectors, who either called for this purpose at the sugar factories of the producers, or were located at convenient central stations in the maple-sugar districts where the licensed producers would bring their sugar to be weighed and sampled.

The sugar samples from the New England States were sent for polarization to the Government laboratory established at Montpelier, Vt., while the samples from the rest of the maple-sugar producing States were sent to the laboratory of this office for polarization, except during the first bounty year ended June 30, 1892, when a laboratory was also maintained at Syracuse, N. Y., where the samples of maple sugar produced in the State of New York were polarized.

The maple sugar is manufactured by the primitive open-kettle process, and is usually molded into solids of the size and shape of bricks. In this form the maple sugar generally appears in the market and demands a price from 100 to 200 per centum over the price of other sugar.

The bounties paid on maple sugar during the existence of the bounty law have been as follows:

In fiscal year ended June 30—

The following statistical statements give in detail the data pertaining to the operations of the licensed maple-sugar producers during the last two fiscal years, as well as the bounty payments on maple sugar during the fiscal year ended June 30, 1894.

NOTE 1.—Four hundred and thirty-six bounty claims, covering 51,147 pounds of second-class sugar, were disallowed, mainly because the claimants had not produced 500 pounds as required by the late bounty law.

NOTE 2.—The total quantity of maple sugar officially weighed and classified amounted to 7,418,770 pounds, which is 236,346 pounds less than the total quantity of maple sugar reported as produced. This discrepancy is caused by errors in the weights reported by the producers and by not presenting all the sugar produced for official weighing.

STATEMENT SHOWING BY COLLECTION DISTRICTS THE NUMBER OF MAPLE TREES TAPPED AND THE PRODUCTS AND BOUNTY CLAIMS MADE BY THE LICENSED MAPLE SUGAR PRODUCERS DURING THE FISCAL YEAR ENDED JUNE 30, 1894, IN SO FAR AS REPORTS HAVE BEEN RECEIVED.
